You're now ready to take action!

You'll notice that your current performance is displayed as a % on a green line. This is the ratio of currently implemented to non-implemented GREENInitiatives (those that do not apply are not included in the calculation).

Next, you'll be able start working on each section by clicking on the right arrow. This will open a table containing three elements for each GREENInitiative: arguments, actions and your toolbox. Click on them to access the related document. Through My Toolbox, you can directly access posters, internal email templates and other instructions. Everything is fully laid out and ready to use!

Don't forget—each time you implement a new GREENInitiative, come back to update your Assessment and watch your performance score improve.

QUALITY OF LIFE AT WORK ⌵

RESPONSIBLE CONSUMPTION PRACTICES ⌴

Use drinking water from the municipal supply ✔

ARGUMENTS
ACTIONS
TOOLS

ARGUMENT

- Bottling one litre of water requires 1/3 to 1/4 litre of oil and 2 to 3 litres of additional water.
- A 1-litre water bottle can cost up to \$1 to produce; a litre of tap water costs an average of \$ 0.002.

Use reusable cups and glasses ✔

ARGUMENTS
ACTIONS
TOOLS

ARGUMENT

- In Quebec, 5 million bags of waste are produced every year.
- Bringing a homemade eco-friendly lunch to work can save lots of money.

Raise awareness about packing eco-friendly lunches ○
